I'm Lewis Anthony McCartney and I have a really awesome girlfriend. Her name's Cleo Amanda Sertori and she's very beautiful.

There are several things that make her so perfect for me...

\_\*\*Even though I'm not a typical 'macho-guy' like Zane for example,  
my Cleo love me and doesn't think that I'm weird for being a  
scientist and fisherman.\*\*\_

\_\*\*Cleo's calm, sweet and girly and that's good. A wild sassy chick

\_\*\*When I went overseas to study science, Cleo didn't stop me from  
going. Even though she love me so much. That's true love!\*\*\_

\_\*\*Cleo and me have known each other since we were 5 years old and  
therefore we know each others ways of doin' things.\*\*\_

Cleo is a true lady and the love of my life.

It wasn't easy to be away from her while I attended the  
science-academy in America, but she didn't stop lovin' me.

Some day I'll ask my sweet Cleo to marry me.

Have a nice day everyone!

Bye!
